SKILLS

Coding Languages

HTML, C, CSS, SQL, Python, Android, Java, PHP, JavaScript and Shell

EDUCATIONAL TRAINING

College Of Applied Science Vttamkulam.
Bachelor of Science in Computer Science.

PROJECT

Interview Mock Tester

"Interview Mock Tester" is a live project which allows all candidates to take mock interviews. The purpose of the system is to give opportunities to all candidates to get a first-hand experience of interview process. Any user can make use of this application to analyze and improve themselves better. The main objective of this application is to help the candidates to overcome their fear of facing interview, analyze themselves and improve better to achieve their dream job. This system provides extra features like suggestion to the candidates to improve themselves much better for next interview. The main advantage of this system is that it will ask set of questions to the candidates based on their CV or resume using Artificial Intelligence. In present sites, they only provide provision for the candidates to take aptitude tests and check their level. There is no such a way to get know about interview process and candidates' ability, level. Comparing with those sites interview mock test application will provide huge impact on candidate's real time interview performance. By taking mock interviews from this application will give the candidates more confidence and prepare them for their interviews in a better way. The fear of facing interview will be overcome by using this application. It will make the candidates more familiar with question that probably asked by the interviewer. Set of questions asked by the application have another advantage that it is made using Artificial Intelligence based on their CV or resume. These set of questions may help the candidates at a particular level.
